

Bailey

Light Flash

*World's largest
range of light
sources*

Bailey is all about light and lighting. For over 25 years Bailey is the right address for all questions about lighting, lamps and special light applications.

Besides expertise, we carry over 30.000 different types in our program of which over 15.000 are in stock. The name Bailey is known all over the world and we export our lamps to 80 different countries. Check www.bailey.nl and find out how extensive our range is.

Bailey for all your lamps

For many years our slogan is 'for all your

lamps'. From miniature lamps to floodlights and from industrial lamps, Infra Red lamps, general lighting for common use to lamps for specific applications such as medical and shipping. We also have a wide range of lighting fixtures.

Bailey: big in miniature lamps

There is no other product to which we are more related to than miniature lamps. That

is no surprise, because in the last decades we profiled ourselves as a real specialist in this market.

With our team of light specialists, we can answer almost any question regarding lighting and lamps. In this edition of LightFlash you will find more information about some of our brands and products.

In our range we have:

- Miniature lamps
- Halogen lamps
- General lighting
- Energy saving lamps
- LED lamps
- (Compact) Fluorescent lamps
- Gas discharge lamps
- Fixtures (LED, low voltage, etc.)

for all your lamps

QL Induction lighting system with an extremely long life

QL Induction lighting systems are gas discharge lamps without electrodes or filaments. These lamps have an extremely long life time up to 100.000 hours with a high light output. The Lumen/Watt ratio is in fact even higher than that of the LED and fluorescent tubes. It is because of these features that the QL Induction lighting system is a great solution if you are looking for savings on your maintenance and energy costs.

Dimming

QL Induction lighting systems are now dimmable for higher energy savings and extended life time. Dimming is available for the 55W, 85W and 165W versions. Dimming QL Induction lights can be used to improve energy efficiencies and reduce energy consumption up to 50%, for example in street lighting applications. The dimmable generators are available for low- and high-voltage supplies.

QL lighting is perfectly suitable for:

- Warehouses and factories (minimum from 4 meters height);
- Shops, hardware stores, showrooms and exhibition halls;
- Animal shelters, stables and riding schools;
- Horticulture, glass- and greenhouses;
- Safety lighting in tunnels and on bridges;
- Signage.

Available in 55W, 85W and 165W and in different colour temperatures.

QL COMPANY
Proven Technology

KANDOLite Also the price is important

Looking for energy and maintenance savings? KANDOLite has the perfect solution. Take a look at the KANDOLite ECO halogen lamps: relatively inexpensive and energy saving up to 30%. The ECO series is your instant replacement for incandescent and halogen lamps. Besides all the common lamps, KANDOLite also produces special ECO halogen lamps such as MR8, MR11, G4, GY6.35, E27 and E14.

KANDOLite has a joint-venture with Osram. This is a guarantee for excellent quality and reliable light sources.

KANDOLite[®]

Bailey provides distribution from GE to wholesale

GE was founded in 1879 by Thomas Edison. Over the last 140 years the company has become a world leader in lighting. Not only in terms of light sources GE is leading, but also in luminaires. For 10 years Bailey is distributor of GE and since 2010 we are designated by GE as a partner towards the electrical wholesalers in the Netherlands.

High-quality GE products

2D lamps

The GE 2D lamp (butterfly lamp) has recently been improved which results in a better light quality. For this lamp with a unique compact shape, GE has developed appropriate fixtures. Recently we expanded our range with the GE 2D Fixture BRIO: an elegant fixture with many applications.

Precise™ ConstantColor™ MR16

Because of the patented reflector coating, these halogen lamps have a homogeneous colour throughout the life of 5.000 hours; they provide bright white light and have no lost backlight. The MR16 IR (Infra Red) version converts the heat to the more visible light and has a lower energy consumption. The energy savings can rise up to 43%!

ConstantColor™ CMH Ultra White

The ConstantColor™ CMH Ultra White is a range of metal halide lamps with a superior life of 15.000 hours. In combination with improved lumen maintenance and a crispier white colour perception, these lamps are ideal for retail.

LED MR16 GU5.3

This range provides fantastic energy saving compared to halogen lamps, offering multiple beam angles and colour temperatures to suit all professional lighting needs. Available in 4W non dimmable (20W equivalent) and 7W dimmable (35W and 50W equivalents). In combination with 25.000 hours life, these LEDs are a durable and superb replacement for MR16 GU5.3 halogen lamps.

LED GU10

The LED GU10 range has 25.000 hours life, is an instant replacement for the 35W and 50W GU10 halogen products and offers substantial energy savings. Available in both a non dimmable and dimmable version so the end user can choose the best solution. The non dimmable range features a 4.5W and 6W with up to 350 lumen in beam and the dimmable types are available in 5W and 6.5W with up to 450 lumen in beam. The advanced optical control of GE LEDs enables you to keep the white light on the target.

Bailey is also distributor for:

- GE Stage/studio lamps
- GE Automotive lamps
- GE Luminaires

Bailey for all your lamps

Bailey answers every LED question

The combination of a good light output, multifunctional applications, extreme long life time and a low power consumption makes LED lighting highly durable and popular. We have a large range of LED solutions to fulfill the market's needs. For example dimmable G9 LEDs, alternatives for the MR11 and AR111 halogen reflector lamps and a wide range low voltage G4, E14, Ba15s and Ba15d LEDs.

Nostalgic lamp shapes with warm white LEDs!

The nostalgic lamp shapes ball, GLS, pigmy, candle and bent tip candle have warm white (2100K) LEDs on the place of the filament. They are perfect for chandeliers or other fixtures in which the light source is clearly visible. Thanks to the low energy consumption and the long life time these LEDs are a durable alternative for the present incandescent bulb.

New: Bailey Marine lamps catalogue

There is a new addition in our catalogue range. We introduce the Marine lamps catalogue. A useful copy specially for customers in the maritime sector. In the back of this catalogue you will find a comprehensive index with unique codes, such as ISSA, US, ANSI and LIF. The catalogue can be downloaded from our website www.bailey.nl. If you have any questions, please contact our sales department. Our team is always glad to help you!

LEG Illumination®

A complete range of fixtures

With over 40 years of experience, LEG Illumination develops and produces fixtures for the professional market. Since 2011 Bailey can offer its customers the whole range of LEG products.

We see it as a welcome addition to our existing assortment. With the LEG fixtures we have the perfect answer to every light question.

LEG Illumination has suitable fixtures for:

- Street lighting
- Sports field lighting
- Garden and park lighting
- Commercial and industrial lighting
- Architectural lighting
- Shop lighting

NEW: LEG MX150 LED

The MX150 LED is a 52W floodlight with a compact and functional design for both indoor and outdoor use. By using highly efficient power LEDs with a life time of more than 50.000 hours, the MX150 LED is a very durable floodlight. Also available with Infra Red sensor.

RIVA superior lamps for industry and transportation

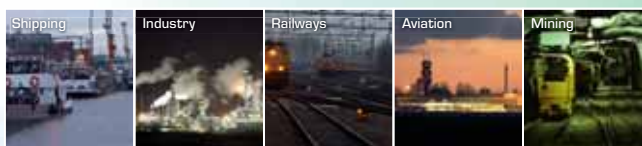

You are looking for lamps with special voltage, extremely long life time, shock resistant lamps, explosion proof lamps, heat resistant lamps or lamps that otherwise need special attention, RIVA lamps are the right choice. RIVA lamps are both made in small and large ranges.

been proven successful in the railways sector.

Bailey is worldwide distributor for RIVA lamps. For more information you can contact Bailey or visit www.riva-lamps.eu.

Because of their various qualitative features RIVA lamps are particularly used in sectors with high demands regarding quality and reliability of light, such as shipping, industry, railways, aviation and mining. Since decades RIVA lamps have worldwide

New: Bailey LED fixtures

We have a new complete range of sustainable LED products for various applications. These products have an excellent value for money and are a good addition to the existing range of LED lighting fixtures.

LED Floodlights

These LED floodlights are IP65 and ideal for architectural and accent lighting to illuminate buildings and parks. Available in 5 wattages and 2 different colours 3000K and 6000K so there is always a suitable solution for all your applications. Because of their low power consumption, a power factor of over 0.9 and an average life time of 30.000 hours, these floodlights are a sustainable alternative which also have all the necessary approvals.

LED Ceiling light

Downlights, which due to their compact size, can be easily installed and are suitable for every application. The uniform light with an angle of 120° and average life time of 45.000 hours make it an enjoyable and sustainable product for general illumination. These are all supplied with an external driver and available in 2 different sizes and colours.

LED Panel light:

Ultrathin LED panels with an average life time of 50.000 hours are the perfect replacement for fluorescent fixtures in e.g. hotels, offices, schools or shops. The wide angle of 120° and 600 SMD LEDs give a nice, soft and uniform light. Because of the compact size, only 12mm thick, the panels with aluminum body are easy and quickly to install. These are all supplied with an external driver and available in different sizes and colours.

Bailey for all your lamps

Infra Red lamps

We also have a full range of high quality Infra Red light sources for multiple applications in among others the catering industry, production of PET bottles or patio heaters.

Stengel low voltage fixtures

As a distributor of the brand Stengel, we offer you a complete range of vehicle illumination. Since 1986 Stengel is mainly manufacturing energy saving lighting for the automotive and shipping market.

Bailey reinforced special lamps

Looking for a bulb with special or additional quality characteristics? We bring an extensive range of incandescent lamps for special applications. Because of the reinforced construction, these lamps have a much longer life time, even in special circumstances. Check www.bailey.nl for the product group "General lighting".

MK Illumination regional company with a global reach

MK Illumination is the European leader of professional Christmas and mood lighting. For The Netherlands, Bailey is the supplier for the wholesale market and worldwide supplier for the LED bulbs.

The premium LED

The golden shine and the welcoming atmosphere make the colour 'warm white' the most used colour for decorative and Christmas lighting. MK's research and development department, together with the world's leading LED manufacturers, developed a light source that combines energy efficiency and high brightness with a warm white colour. The LED has a considerable lower energy consumption, but gives almost the same colour as a traditional bulb.

MK only uses low power LEDs

These LEDs are ideal for decorative and festive lighting because of their low heat production. All MK products are approved by European institutions (SLG, KEMA, TÜV) so customers are guaranteed the highest safety.

Optimal light distribution: 360 °

MK only uses LEDs which are encapsulated with epoxy resin in a special polycarbonate cover. This gives a soft light that spreads out 360°. The special composition of the resin reinforces the light and also ensures that the light sparkles like a diamond.

The benefits of MK Premium LED products

- Bright colours and no UV radiation
- Minimal loss of brightness
- Longer life time
- Power savings up to 80-90%
- Reduction of CO₂ emissions
- Unbreakable polycarbonate housing
- Shock resistant

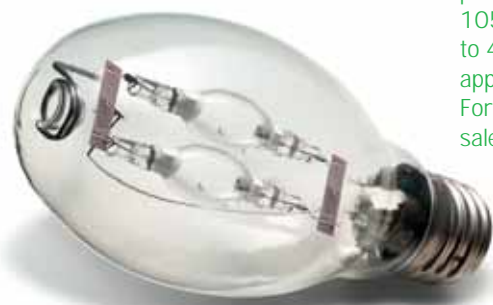

Venture Lighting, bright ideas

Since 2011 Bailey is an official distributor of Venture Lighting. This American company with its European headquarters in England is entirely dedicated to the production of metal halide lamps. Besides the standard versions of the metal halide lamps, Venture Lighting also has a number of specials in

their range of vision with which they distinguish themselves from other brands.

Pulse Start Sustainability Twin ARC - Metal Halide Lamp

Venture's Twin ARC lamp delivers twice the rated life of many of our regular Pulse Start products. Combining lamp efficacies of up to 105 Lumen per Watt with a rated life of up to 40.000 hours, this lamp is ideal for lighting applications where access is difficult or costly. For more information please contact our sales department.

Bailey for all your lamps

Bailey Medical lamps

Our Medical and microscope lamps catalogue is specially composed for customers in the medical and laboratory industry. All lamps are sorted by brand and application, which makes it possible to quickly find the right lamp. The Medical lamps catalogue can be downloaded from our website.

Bailey Miniature lamps

We collected the world's largest range of miniature lamps in one catalogue and hold a large part in stock. We also have a separate catalogue for the LED miniature lamps to keep it well-ordered.

Bailey Marine lamps

We offer a complete range of light sources for the marine and shipping industry. Our range includes navigation, buoy, current indicator, search-light lamps and many more. If you are looking for a lamp in this field, Bailey can offer it!

www.bailey.nl a complete database

Bailey has a complete database with extensive search possibilities. The best part is that our database is available for everybody. What more can you wish for! You can search for lamps and fixtures by Bailey classification and ETIM classification. With our Quick search you always find what you are looking for. You can search by either:

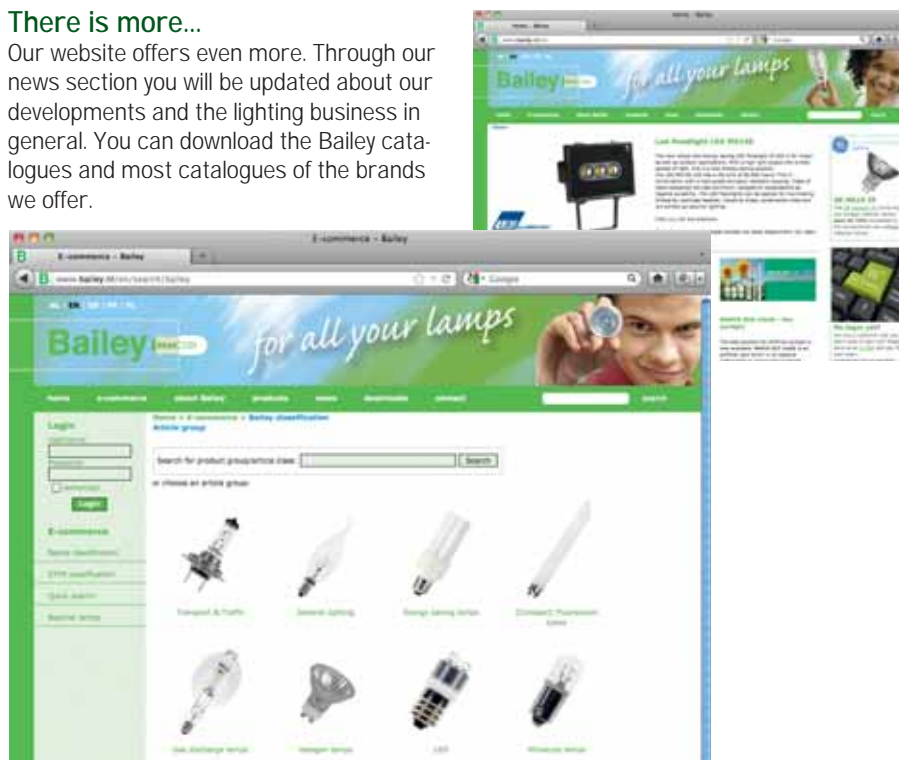

- Bailey part number
- Your part number
- EAN code
- ISSA
- ANSI, LIF or US code
- Part numbers of certain brands like GE, Philips, Osram, etc.

E-commerce

In the E-commerce section of our website you can place your order whenever you want. Whether you want to place an order, see if your product is available, check the prices or simply look for product information, www.bailey.nl is the right place to visit!

There is more...

Our website offers even more. Through our news section you will be updated about our developments and the lighting business in general. You can download the Bailey catalogues and most catalogues of the brands we offer.

FAEL LUCE: that's clear

FAEL LUCE is a renowned Italian company that produces lighting fixtures for street lighting, high bays, floodlights and sports field lighting for customers all around the world. If you are looking for high light output, FAEL LUCE offers you various high quality solutions. With the in house R&D department, an advanced laboratory and a hypermodern production facility, it is clear that quality is all that matters to FAEL LUCE.

Shipping

These high quality fixtures are ideal for industrial applications where only the best is good enough. The aluminum body contains little copper and because of the special coating the fixtures are protected against heavy weather. The use of hardened glass and stainless screws guarantee that FAEL

products are suitable for the shipping industry.

Sports field lighting

The LIGHTMASTER series is the result of extensive research on advanced professional sports field lighting. Because of the high lighting output these fixtures are suitable for installation to heights up to 70

meters! The compact and light body provides low resistance to wind and therefore can also be used on smaller masts. In combination with the high weather resistance, this series of fixtures is the perfect solution for sports field lighting!
