

Charge&Go Table Lamp

Bailey lights
for professionals

With the Charge&Go rechargeable table lamp, Bailey is expanding the range for the hospitality industry as well as for the outdoors at the same time. These attractive metal table lamps are wireless and can be charged via the included USB-C 5Vdc charging cable.

Because two metal tubes are included, you can choose the height of 38cm or 26cm. They emit 2700K warm light (210 lumens), which can also be dimmed steplessly via the on/off button located on top. The weighted square base has an anti-slip layer. Fully charging the 2000mAh battery takes 5 hours, after which the lamp burns for approximately 6 to 10 hours. This stylish lamp is rainwater resistant (IP54) so if you forget to bring the lamp in during a shower, that is no problem. Available in stylish black, serene white and trendy gold. If you want to charge several lamps at the same time, choose the multi-charger (145894) with which you can charge 10 lamps at a time.

Areas of application:

In places where there are few power supplies available but you still want to have functional and decorative light. Areas like;

- Bar / Restaurant
- Terrace
- Camping
- Temporary workplace
