Sustainability is not only about replacing old light sources with a more energy-efficient version, but also about reusing existing fixtures.

Sustainability is not only about replacing old light sources with a more energy-efficient version, but also about reusing existing fixtures. It is even more sustainable when 9 different versions are combined in 1 product. This saves on transport and storage. The special thing about the Switch series is that by simply adjusting a switch, the power and the light color can change. That's Smart and Green Thinking.
