top transformers

# topo transformers

With the Bailey tOpO transformer series, Bailey introduces a number of electronic transformers that covers a great need in the market in this area.

Topo is Italian for mouse and that is a perfect comparison; flexible, small in size but big in performance. The Bailey tOpO transformer fits very good in small spaces such as a suspended ceiling.

This dimmable transformer starts at 0W which is ideal for LED lamps because no minimum load is required. In addition to 12V LED lamps, this transformer is also suitable for 12V halogen lamps. Dimmable with both trailing edge and leading edge dimmers. For the conversion to LED, one must calculate as follows: 105W (Mighty type) halogen = 70W LED, 70W halogen (Jerry type) = 45W LED, 50W halogen (Mini type) = 30W LED, 50W halogen (Little type) = 20W LED.

To make the whole even more attractive and recognizable, the housing is in the well-known Bailey **green**.

# topo combinations

The Topo transformers combine perfectly with the Bailey 12V low-voltage lamps in halogen and LED.

On this page some LED examples, G4, G6.35, GY6.35, GU4 (MR8, MR11), GU5.3 (MR16), G53 (ES111/R111), Ba15d (AR37, AR56, AR70, P26), E14 (T25, P26), E27 (A60, G45), B22d (A60, G45).

There is a new topo in town!! 🤔 We call him Little.

**Bailey** lights  
for professionals

- 12V For 12V LED and halogen lamps
- 0W Starts from 0W (ideal for LED)
- Works with most trailing edge and leading edge dimmers
- Very compact
