

Tomorrow's Products Today!

Omicron®

## Tomorrow's Products Today

Formed back in 1994 by the Ward family, Omicron has developed a reputation for innovation and product design since the company's foundation.

First to market the energy saving GLS in the UK, Omicron has always, and will continue to focus its efforts to offer the consumer real options in lighting to save money and to help the environment.

Having previously expanded the range to just over 240 energy saving products, this catalogue introduces almost 100 new energy saving lamps.

Today consumers are looking at all aspects of their carbon foot print and lighting plays a big part in how we can all reduce our emissions. Omicron's depth of range makes it simpler for the consumer to find an energy saving lighting solution.

The energy saving market and it's consumers, demand a high quality product which Omicron can deliver with its proven track record of quality.

In 2007 Omicron opened its Central European Office in Bratislava, Slovakia and the brand is now freely available throughout Europe from Omicron's appointed distributors.

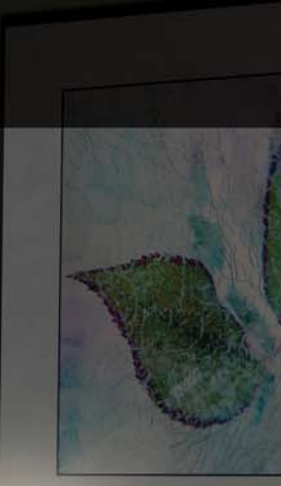

Today Omicron offers the largest range of energy saving lamps available in Europe. Our success is built on the ability to listen and react to the lighting market's needs.

## The best of the rest

Energy saving sensor lamps incorporate a dusk till dawn photocell. Ideal for use as a security light or an outside light. Brand new design provides large light output in a compact innovative style.

Energy Saving Mini Lotus offers an excellent light spectrum from its modern design.

Omicron's Bug Lamp is designed to emit a light that repels insects and bugs, GX53 for under cabinet light.

Omicrons 16 & 28w bulk head lamps are available in both 2700k & 3500k.
